

## CHARACTERISTICS

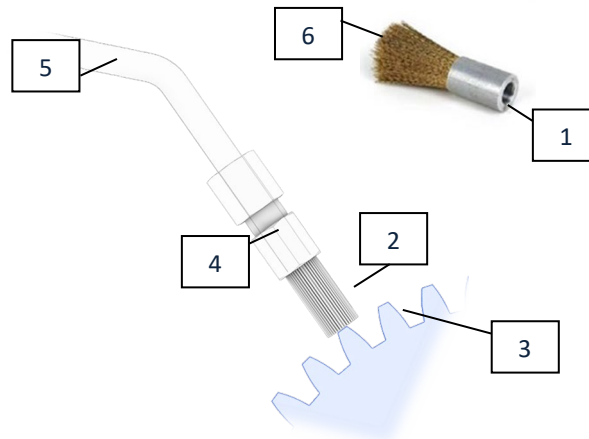

- **PERLON 0.2 MM**  
Temperature resistant up to 90°C
- **NYLON BLACK 0.3 mm**  
Temperature resistant up to 100°C
- **BRASS WIRE 0.2**  
Brass and steel bristles have a high temperature resistant up to 200°C
- **FLEXIBLE**  
Flexible connections possibilities to connect directly with a tube or with a fitting to a female or male thread

## OIL BRUSHES (SMALL RANGE)

Industrial Brushes come in different sizes. Food production, manufacturing, construction, maintenance, almost all industries use these brushes for several purposes. These brushes have a great number of applications.

### Application

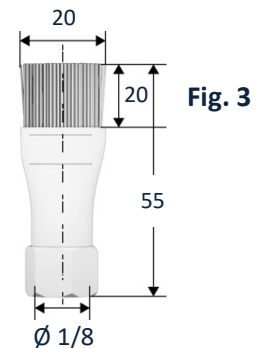

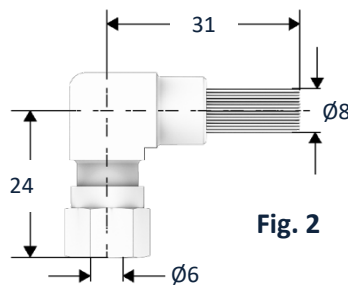

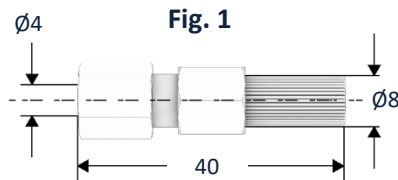

- |                               |                     |
|-------------------------------|---------------------|
| 1. Threaded connection        | 4. Pipe connection  |
| 2. Brush for smearing oil     | 5. Lubrication line |
| 3. Gearwheel (friction point) | 6. Brass Brush      |

## APPLICATIONS

For precise dosing lubrication of the friction point using a brush for oil.

Versions see below:

## Ordering information

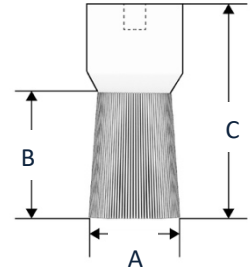

Order number	Fig.	Brush material	Ø bristle [mm]	Bristle form
P30046809	1	Perlon	0,2	Straight
P30045841	2	Perlon	0,2	Straight
K000593	3	Aluminium body, Nylon bristles	0,2	Straight

## OIL BRUSHES (LARGE RANGE)

### Ordering information

Part n.	Description bristle material	Dimensions in mm			Body	Inlet
		A	B	C		
2049028	Round steel bristles	30	50	75	Aluminium	1/8 BSPF
2049011	Round steel bristles	16	30	55	Steel	1/8 BSPF
2049012	Round stainless-steel bristles	16	30	55	Steel	1/8 BSPF
2049009	Round nylon bristles	17	34	59	Aluminium	1/8 BSPF
2049043	Round PVC bristles	25	35	60	PVC	1/8 BSPF
2049008	Round nylon bristles	30	54	79	Aluminium	1/8 BSPF
P30320302	Round nylon bristles	20	29	52	Aluminium	M8 x 1
P30320305	Round brass bristles	20	29	52	Aluminium	M8 x 1

### Order number

Part n.	Description	Dimensions in mm			Body	Inlet
		A	B	C		
2037165	Flat nylon brush	57	30	50	Aluminium	1/8 BSPF
2037166	Flat steel brush	57	30	50	Aluminium	1/8 BSPF
