

SAFETY DATA SHEET

MAXTREME OIL

Complies with Regulation (EC) No. 1907/2006 (REACH), Annex II, and subsequent amendments introduced by Commission Regulation (EU) No. 2020/878- Italy

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product Code : 3226692 ÷ 3226694 / 3226700 ÷ 3226702
 Product Name : MAXTREME OIL
 Other means of identification : Not available

1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant uses : Neat oil for metalworking, cutting oil
 Uses to avoid : Other purposes

1.3 Details of the supplier of the safety data sheet

Supplier : DROPSA S.p.A. (Italy)
 Via Benedetto Croce, 1
 20055 Vimodrone (MI) – Italy
 T.: +39 02.250.79.1
 www.dropsa.com

1.4 Emergency telephone number

Poison Control Centers (CAV) telephone numbers:
 Telephone number Niguarda Hospital (Milan – Italy)
 Tel. +39 02 66.101.029 (24/7)

Date of issue/Date of revision

June 19, 2024

Version: 1.04

 dropsa.com

Mod. 0.6 E Rev. 0

Complies with Regulation (EC) No. 1907/2006 (REACH), Annex II, and subsequent amendments introduced by Commission Regulation (EU) No. 2020/878 - Italy

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

This product is not classified as dangerous according to Regulation (EC) 1272/2008 and subsequent amendments.

Product definition: *Mixture*

: Classification according to EC Regulation No.1272/2008 [CLP/GHS]

Unclassified.

2.2 Label elements

Warning Hazard statements No warnings.

Precautionary statements No known significant effects or critical hazards.

Prevention Not applicable

Reaction and Not applicable

Conservation Not applicable

Disposal Not applicable

Contains 1H-Benzotriazole-1-methanamine, N,N-bis(2-ethylhexyl)-ar-methyl-. It may cause an allergic reaction.

Additional elements of the label Safety data sheet available upon request.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, preparations and articles Not applicable

2.3 Other hazards

The product meets the criteria for PBT or vPvB in accordance with Regulation (EC) No. 1907/2006, Annex XIII This mixture does not contain any substances assessed as PBT or vPvB.

Other hazards not mentioned in the classification None known

SECTION 3: Composition/information on ingredients

3.2 Mixtures : Mixture

Product Name/ Ingredients	Identification	%	Classification	Conc. specifies limits, M-factors and ATE	Type
1H-Benzotriazole-1-methanamine, N,N-bis(2-ethylhexyl)-ar-methyl-	REACH #: 01-2119982395-25 EC: 939-700-4 CAS number: 94270-86-7	≤0.3	Skin Irrit. 2, H315 Skin Sens. 1B, H317 Aquatic Acute 1, H400 Aquatic Chronic 2, H411 See section 16 for the full text of the hazard statements listed above.	M [Acute] = 1	[1]

Mod. 0.6 E Rev. 0

Complies with Regulation (EC) No. 1907/2006 (REACH), Annex II, and subsequent amendments introduced by Commission Regulation (EU) No. 2020/878 – Italy

SECTION 3: Composition / information on ingredients

There are no additional ingredients which, within the supplier's current knowledge and in the applicable concentrations, are classified as hazardous to health or the environment, meet the PBT or vPvB criteria, or are considered to be substances of equivalent concern or substances to which an occupational exposure limit has been assigned, and which therefore need to be reported in this section.

Type [1] Substance presenting a danger to health or the environment

SECTION 4: First aid measures

4.1 Description of first aid measures

General warning	Consult a doctor. If you need to consult a doctor, have a medical record available. The product container or label. Use the required personal protective equipment. Remove contaminated clothing and wash it before reuse. Wash skin surfaces thoroughly after contact.
For inhalation	Transport the patient to fresh air. If breathing is not possible. If you experience irregular breathing or respiratory arrest, administer artificial respiration or oxygen to a trained person. Consult a doctor.
Skin contact	Wash thoroughly with soap and water. Remove all contaminated clothing and wash them before wearing them again.
Eye contact	Rinse immediately with running water for at least 15 minutes, lifting occasionally check the upper and lower eyelids. Remove any contact lenses you are wearing if easy to do so.
Ingestion	Ingestion may cause gastrointestinal irritation and diarrhea. Do not induce vomiting unless directed by medical personnel. Never give anything by mouth to an unconscious person.

4.2 Most important symptoms and effects, both acute and delayed

By inhalation:	Not expected under normal conditions of use.
Contact with skin:	Not expected under normal conditions of use.
Contact with eye:	Not expected under normal conditions of use.
Ingestion:	Not expected under normal conditions of use.

4.3 Indication of any need to immediately consult a doctor and require special treatment

Notes for the doctor	Treat symptomatically.
Specific treatments	No specific treatment.
Protection of rescuers	No action shall be taken which involves any personal risk or without proper training, performing mouth-to-mouth resuscitation can be dangerous for the person providing assistance. Remove contaminated clothing after thoroughly washing it with water or using gloves. Use the required personal protective equipment.

SECTION 5: Fire-fighting measures

5.1 Extinguishing media

Suitable extinguishing media	Use an extinguishing agent suitable for the surrounding fire. Use product-dry chemicals, CO ₂ , water spray or foam.
Unsuitable extinguishing media	Do not use full jet water.

5.2 Special hazards arising from the substance or mixture

Hazards arising from the substance or mixture	In case of fire or overheating, an increase in pressure will occur with the possibility of container breakage.

Mod. 0.6 E Rev. 0

Complies with Regulation (EC) No. 1907/2006 (REACH), Annex II, and subsequent amendments introduced by Commission Regulation (EU) No. 2020/878 - Italy

SECTION 5: Fire-fighting measures

Hazardous combustion products In case of fire, hazardous decomposition products may be produced. oxides of carbon (CO, CO₂) nitrogen oxides phosphorus oxides.

5.3 Recommendations for firefighters

Special protective measures for firefighters' Promptly isolate the area by removing all persons from the accident area in case of fire, no action should be taken involving any personal risk or without appropriate training.

Special protective equipment for firefighters Firefighters must wear protective equipment and self-contained breathing apparatus (SCBA) with a full-face mask operating in positive pressure. Firefighter clothing (including helmets, protective boots, and gloves) compliant with European standard EN 469 will provide basic protection for chemical accidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For those who do not intervene directly No action shall be taken involving any personal risk. or without appropriate training. Wear appropriate protective equipment (see Section 8). Keep unnecessary personnel away.

For those who intervene directly If handling the spill requires the use of special clothing, please note any information in Section 8 regarding suitable and unsuitable materials. See also the information in "For non-emergency personnel."

6.2 Environmental precautions

Inform the relevant authorities if the product has caused pollution environmental (sewers, waterways, soil, or air). Do not allow potentially contaminated water, including stormwater, spill runoff, or firefighting activities, to enter waterways, drains, or sewers.

6.3 Methods and materials for containment and cleanup

Small spill

Stop the leak if safe to do so. Move containers from the spill area. Prevent spillage into sewer systems, waterways, basements, or confined areas. Absorb with an inert material and place the spilled product in an appropriate recovery container. Dispose of through a licensed waste disposal company.

Large pour

Stop the leak if safe to do so. Move containers from the spill area. For large spills, dam the spilled substance or otherwise contain it to ensure that the runoff does not reach a waterway. Absorb with an inert material and place the spilled product in an appropriate recovery container. Dispose of through a licensed waste disposal company.

6.4 Reference to other sections

See Section 8 for information on appropriate individual protective equipment. For further information on waste treatment, see Section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Protective measures

Wear appropriate protective equipment (see Section 8). Do not put in contact with eyes, skin, or clothing. Do not breathe vapor or mist. Do not ingest.

Warnings on general occupational hygiene practices

Eating, drinking and smoking are prohibited in areas where the material is handled, stored or treated. People using the product should wash their hands and face before eating, drinking, and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for further information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Date of issue/Date of revision

June 19, 2024

sales@dropsa.com
dropsa.com

Mod. 06 E Rev. 0

Complies with Regulation (EC) No. 1907/2006 (REACH), Annex II, and subsequent amendments introduced by Commission Regulation (EU) No. 2020/878 - Italy

SECTION 7: Handling and storage

Store in accordance with local regulations. Store in the original container protected from direct sunlight in a dry, cool, well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Do not store in unlabeled containers. Provide adequate containment to prevent environmental contamination.

Storage temperature

Store at temperatures between 5 to 40°C (41 to 104°F).

Shelf life

24 months

7.3 Specific end uses

Warnings

Follow the instructions for use in the technical data sheet.

Specific guidelines

for the industrial sector

Follow the instructions for use in the technical data sheet.

SECTION 8: Exposure controls/personal protection

The information in this section contains general guidance and warnings. The information provided refers to the typical intended uses of the product. Additional measures may be required for bulk handling or other uses that could significantly increase worker exposure or emissions to the environment.

8.1 Control parameters

Occupational exposure limits

No exposure limit value known.

Recommended

Monitoring Procedures:

Refer to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance on the assessment of exposure by inhalation to chemical compounds for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guidance on the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference should also be made to national guidance documents on methods for the determination of dangerous substances.

DNEL/DMEL

No DNEL/DMEL available.

PNEC

No PNEC available.

8.2 Exposure controls

Suitable technical checks

Good general ventilation should be sufficient to control operator exposure to air pollutants. Engineering controls should be considered the first line of protection against adverse exposure to harmful substances. Administrative controls and personal protective equipment should be used in the absence of engineering controls or as supplementary controls where engineering controls are insufficient to reduce specific exposures to an acceptable level.

Individual protection measures If contact is possible, use the following protective equipment, unless: the assessment indicates the need for a higher level of protection: protective glasses with side shields

Skin protection

Mod. 0.6 E Rev. 0

Complies with Regulation (EC) No. 1907/2006 (REACH), Annex II, and subsequent amendments introduced by Commission Regulation (EU) No. 2020/878 - Italy

SECTION 8: Exposure controls/personal protection

Hand protection

For operations where prolonged or repeated contact with the skin may occur, impervious gloves should be worn. The following type of gloves may be suitable for handling this product: Protective gloves according to EN 374

nitrile rubber	Thickness of gloves: 0.38 mm ≥	Cracking time: ≥ 480 minutes
butyl rubber	Thickness of gloves: 0.64 mm ≥	Cracking time: ≥ 480 minutes

The user must ensure that the final choice of glove type for handling this product is the most appropriate and takes into account the specific conditions of use, as specified in the user's risk assessment. Follow the instructions and information provided by the glove manufacturer regarding use, storage, maintenance, and replacement. Always ensure that gloves are free from defects and are stored and used correctly. Barrier creams can protect exposed skin areas, but do not apply them after exposure.

Other skin protection devices

Choose appropriate footwear and any additional protective measures of the skin based on the activity being performed and the risks involved. Such choices must be approved by a specialist before handling this product. Wear suitable work clothing.

Respiratory protection

No personal respiratory protective equipment is normally required. When room ventilation is inadequate, wear respiratory protection. If the environment is overheated and ventilation is inadequate, use a respirator to protect against organic vapor, dust, and mist. Depending on the hazard and potential for exposure, select a respirator that meets appropriate standards and certification.

This information is based on the state in which the specific product is delivered and the intended use specified in this SDS. This information is provided on the basis of bibliographical references, manufacturer's specifications and recommendations and/or deduced by analogy with similar substances. The level of protection and types of exposure controls vary depending on the potential exposure conditions.

Hygiene measures

Before eating, smoking and using the bathroom and at the end of the working period, Wash your hands, arms and face thoroughly after handling chemicals. Eating, drinking, and smoking are prohibited in areas where the material is handled, stored, or processed. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing it. Ensure eyewash stations and emergency showers are close to where they are used. Ensure regular inspection, cleaning, and maintenance of equipment and machinery.

Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with environmental protection legislation. In some cases, it will be necessary to perform flue gas scrubbing, add filters, or make technical modifications to the process equipment to reduce emissions to acceptable levels.

Thermal hazards

Not expected under normal conditions of use.
Not relevant/applicable due to the nature of the product.

Section 9. Physical and chemical properties

9.1 Information on basic physical and chemical properties

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No. 1272/2008

Acute toxicity

Based on available data, the classification criteria are not met.

Numerical measures of toxicity

Product name/ Ingredients	Result	Species	Dose	Exposure
1H-Benzotriazole- 1-methanamine, N,N-bis (2-ethylhexyl)-ar-methyl-	LD50 Dermal	Rabbit	>2000 mg/kg	-
	LD50 Oral	Rat	3313 mg/kg	-

Irritation/Corrosion

Based on available data, the classification criteria are not met.

Respiratory or skin sensitization

Based on available data, the classification criteria are not met.

Mutagenicity

Based on available data, the classification criteria are not met.

Carcinogenicity

Based on available data, the classification criteria are not met.

Reproductive toxicity

Based on available data, the classification criteria are not met.

Specific target organ toxicity (STOT) - single exposure

Based on available data, the classification criteria are not met.

Specific target organ toxicity (STOT) - repeated exposure

Based on available data, the classification criteria are not met.

Aspiration hazard

Based on available data, the classification criteria are not met.

Further information

No items identified.

Information on likely routes of exposure

By inhalation

No known significant effects or critical hazards.

Contact with skin

No known significant effects or critical hazards.

Contact with eyes

No known significant effects or critical hazards.

Ingestion

No known significant effects or critical hazards.

Symptoms related to physical, chemical and toxicological characteristics

By inhalation

Not expected under normal conditions of use.

Contact with skin

Not expected under normal conditions of use.

Contact with eyes

Not expected under normal conditions of use.

Ingestion

Not expected under normal conditions of use.

Immediate, delayed and chronic effects resulting from short and long -term exposures

No elements identified.

11.2 Information on other hazards

11.2.1 Endocrine-disrupting properties Not available.

11.2.2 Other information Not available.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Disposal methods

Disposal of this product, solutions and any by-products must be Always follow environmental protection and waste disposal regulations and the requirements of any relevant local authorities. Dispose of surplus and non-recyclable products through a licensed waste disposal company. Empty containers or liners may retain product residue. Empty containers retain product residue and can be dangerous. Care should be taken when handling emptied containers that have not been cleaned or rinsed.

SECTION 14: Transport information
